Descriptions
(2)

Please complete (1) – (7) above (prior to continuing)

Changes in plans must be approved by the Planning & Zoning Dept.

(8) **Setbacks:** (measured to the closest point)

Description	Setback Measurements		Description	Setback Measurements
Setback from the Centerline of Platted Road	90' Feet		Setback from the Lake (ordinary high-water mark)	Feet
Setback from the Established Right-of-Way	Feet		Setback from the River, Stream, Creek	Feet
			Setback from the Bank or Bluff	Feet
Setback from the North Lot Line	330 Feet			
Setback from the South Lot Line	90 Feet		Setback from Wetland	Feet
Setback from the West Lot Line	250 Feet		20% Slope Area on the property	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Setback from the East Lot Line	200 Feet		Elevation of Floodplain	Feet
Setback to Septic Tank or Holding Tank	120' Feet		Setback to Well	105 Feet
Setback to Drain Field	Feet			
Setback to Privy (Portable, Composting)	Feet			

Prior to the placement or construction of a structure within ten (10) feet of the minimum required setback, the boundary line from which the setback must be measured must be visible from one previously surveyed corner to the other previously surveyed corner or marked by a licensed surveyor at the owner's expense.

Prior to the placement or construction of a structure more than ten (10) feet but less than thirty (30) feet from the minimum required setback, the boundary line from which the setback must be measured must be visible from one previously surveyed corner to the other previously surveyed corner, or verifiable by the Department by use of a corrected compass from a known corner within 500 feet of the proposed site of the structure, or must be marked by a licensed surveyor at the owner's expense.

(9) **Stake or Mark Proposed Location(s)** of New Construction, Septic Tank (ST), Drain field (DF), Holding Tank (HT), Privy (P), and Well (W).

NOTICE(s):

All Land Use Permits Expire One (1) Year from the Date of Issuance if Construction or Use has not begun.

For the Construction of New One & Two Family Dwelling: ALL Municipalities Are Required To Enforce The Uniform Dwelling Code.

The local Town, Village, City, State or Federal agencies may also require permits.

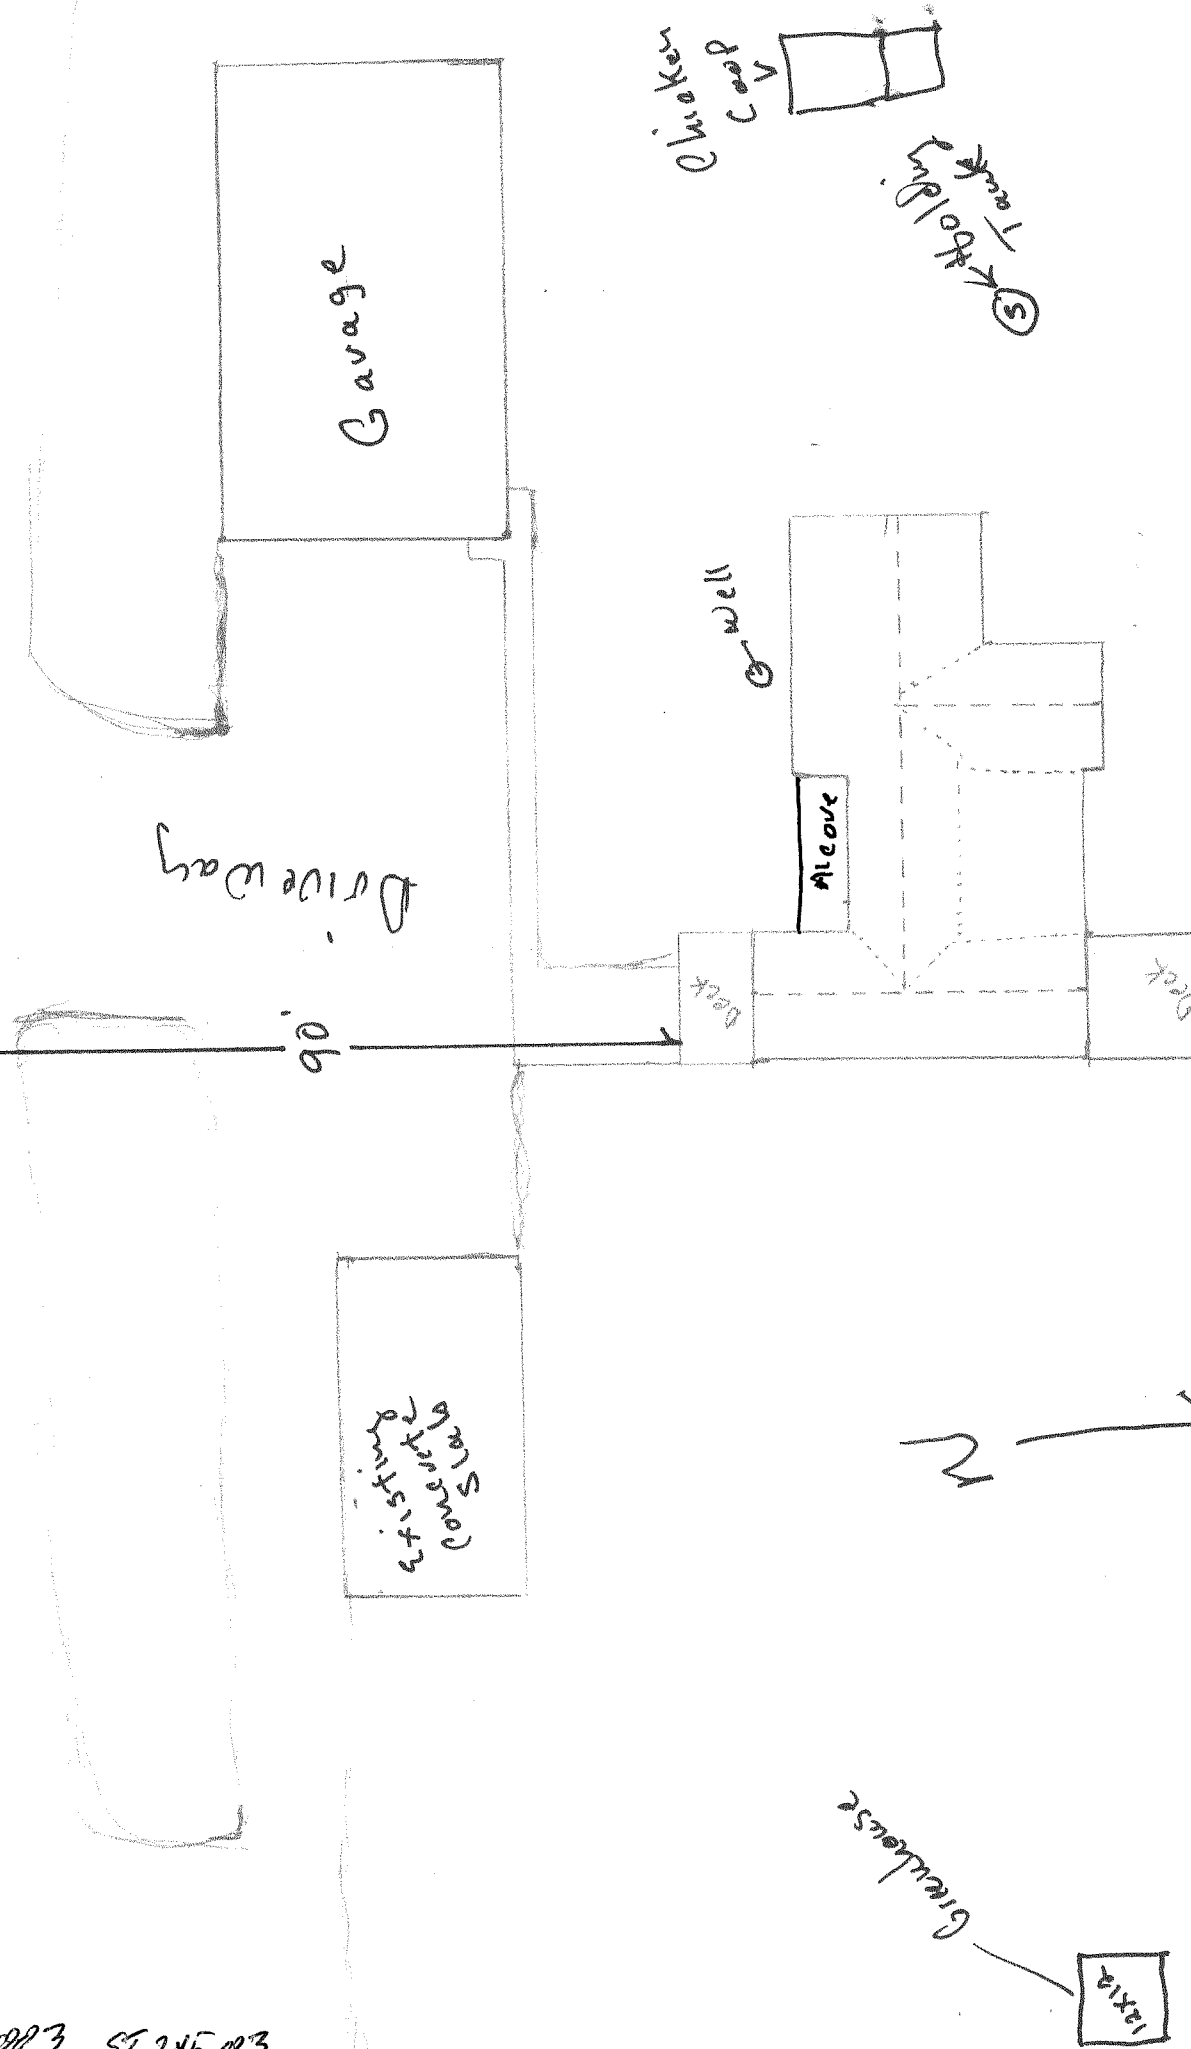

If subject property is part of a Condominium Plat, applicant hereby certifies and represents that applicant has all necessary approvals and recorded documents required to complete the project for which this permit is sought including requirements set forth in Wisconsin statutes pertaining to condominium associations, the Declaration of the Condominium Association in which the property is located, and all other rules, regulations and requirements pertaining to that Condominium Association.

You are responsible for complying with state and federal laws concerning construction near or on wetlands, lakes, and streams. Wetlands that are not associated with open water can be difficult to identify. Failure to comply may result in removal or modification of construction that violates the law or other penalties or costs. For more information, visit the department of natural resources wetlands identification web page or contact a department of natural resources service center (715) 685-2900.

Gov't Lot Lot Block Subdivision CSM#

Residential

For: **Addition/Alteration: [1- Story]; Repairing Roof (58' x 35') including Enclosing Alcove (12' x 7') = 2.030 sq. ft.**
Height of 16'

(Disclaimer): Any future expansions or development would require additional permitting.

Condition(s): Build as Proposed. Obtain a Uniform Dwelling Code (UDC) permit from the locally contracted UDC inspection agency prior to start of construction (if required). Must meet and maintain setbacks.

You are responsible for complying with state and federal laws concerning construction near or on wetlands, lakes, and streams. Wetlands that are not associated with open water can be difficult to identify. Failure to comply may result in removal or modification of construction that violates the law or other penalties or costs. For more information, visit the department of natural resources wetlands identification web page or contact a department of natural resources service center (715) 685-2900.

NOTE: This permit expires one year from date of issuance if the authorized construction work or work or land use has not begun.

Changes in plans or specifications shall not be made without obtaining approval. This permit may be void or revoked if any of the application information is found to have been misrepresented, erroneous, or incomplete.
This permit may be void or revoked if any performance conditions are not completed or if any prohibitory conditions are violated.

SEE ATTACHED

Please complete (1) – (7) above (prior to continuing)

Changes in plans must be approved by the Planning & Zoning Dept.

(8) **Setbacks:** (measured to the closest point)

Description	Setback Measurements	Description	Setback Measurements
Setback from the Centerline of Platted Road	3,200 Feet	Setback from the Lake (ordinary high-water mark)	MILES Feet
Setback from the Established Right-of-Way	3,200 Feet	Setback from the River, Stream, Creek	OVER TOP Feet
Setback from the North Lot Line	1,400 Feet	Setback from the Bank or Bluff	OVER TOP Feet
Setback from the South Lot Line	3,100 Feet	Setback from Wetland	NONE Feet
Setback from the West Lot Line	3,100 Feet	20% Slope Area on the property	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
Setback from the East Lot Line	1,500 Feet	Elevation of Floodplain	Feet
Setback to Septic Tank or Holding Tank	1,400 Feet	Setback to Well	1,400 Feet
Setback to Drain Field	N/A Feet		
Setback to Privy (Portable, Composting)	N/A Feet		

Prior to the placement or construction of a structure within ten (10) feet of the minimum required setback, the boundary line from which the setback must be measured must be visible from one previously surveyed corner to the other previously surveyed corner or marked by a licensed surveyor at the owner's expense.

Prior to the placement or construction of a structure more than ten (10) feet but less than thirty (30) feet from the minimum required setback, the boundary line from which the setback must be measured must be visible from one previously surveyed corner to the other previously surveyed corner, or verifiable by the Department by use of a corrected compass from a known corner within 500 feet of the proposed site of the structure, or must be marked by a licensed surveyor at the owner's expense.

(9) **Stake or Mark Proposed Location(s)** of New Construction, Septic Tank (ST), Drain field (DF), Holding Tank (HT), Privy (P), and Well (W).**NOTICE(s):**

All Land Use Permits Expire One (1) Year from the Date of Issuance if Construction or Use has not begun.

For the Construction of New One & Two Family Dwelling: ALL Municipalities Are Required To Enforce The Uniform Dwelling Code.

The local Town, Village, City, State or Federal agencies may also require permits.

If subject property is part of a Condominium Plat, applicant hereby certifies and represents that applicant has all necessary approvals and recorded documents required to complete the project for which this permit is sought including requirements set forth in Wisconsin statutes pertaining to condominium associations, the Declaration of the Condominium Association in which the property is located, and all other rules, regulations and requirements pertaining to that Condominium Association.

You are responsible for complying with state and federal laws concerning construction near or on wetlands, lakes, and streams. Wetlands that are not associated with open water can be difficult to identify. Failure to comply may result in removal or modification of construction that violates the law or other penalties or costs. For more information, visit the department of natural resources wetlands identification web page or contact a department of natural resources service center (715) 685-2900.

GP-NO-2021-4-03658

Dear Mr. Barnes:

Thank you for submitting an application for a General Permit to place a clear span bridge over an unnamed tributary of South Fish Creek (WBIC 2890000) located in the NE 1/4, SW 1/4, Sec. 22, T. 47, R. 05W, Town of EILEEN, Bayfield County.

You have certified that your project meets the eligibility criteria for this activity. Based upon your signed certification you may proceed with your project. Please take this time to re-read the permit standards and conditions. You are responsible for meeting all general permit eligibility standards and permit conditions. This includes notifying the Department before starting the project, and submitting photographs within one week of project completion. We have not reviewed your plans for compliance with installation and construction standards. You are responsible for ensuring that the project meets all eligibility standards described on the attached checklist. Please note that your project must be complete within 3 years of the date of this letter.

The Department conducts routine and annual compliance monitoring inspections. Our staff may follow up and inspect your project to verify compliance with state statutes and codes. If you need to modify your project please contact your Water Management Specialist, Nathan Walker at (715) 492-0243 or email nathan.walker@wisconsin.gov to discuss your proposed modifications. If you fail to comply with state statutes and code, the Department has the authority to pursue enforcement which could include site restoration and fines.

The Department of Natural Resources appreciates your willingness to comply with waterway regulations, which help to protect the water quality, fish and wildlife habitat, natural scenic beauty and recreational value of Wisconsin's water resources for future generations. You are responsible for obtaining any other local, state or federal permits that are required before starting your project.

Sincerely,

Nathan Walker
Water Management Specialist

Copy to: USACE Project Manager
Robert Schierman, Bayfield County Zoning Administrator
Amie Egstad, Conservation Warden

ELIGIBILITY CRITERIA

Eligibility criteria:

1. Accumulated brush, debris or other obstructions that are trapped in or underneath the structure will be regularly removed to prevent upstream flooding and to maintain structural integrity.
2. Erosion control measures shall meet or exceed the technical standards for erosion control approved by the department under subch. V of ch. NR 151. Any area where topsoil is exposed during placement, repair or removal of a structure shall be immediately seeded and mulched to stabilize disturbed areas and prevent soils from being eroded and washed into the waterway. These standards can be found at: <http://dnr.wi.gov/topic/stormwater/standards/>.
3. The plans ensure that any area where topsoil is exposed during the placement, repair or removal of the structure will be immediately seeded and mulched to stabilize disturbed areas and prevent soils from being eroded and washed into the waterway.
4. Unless part of a permanent storm water management system, all temporary erosion and sediment control practices will be removed upon final site stabilization. All areas disturbed during removal of temporary erosion and sediment control practices will be restored.
5. All grading, excavation and land-disturbance activities in the plans and specs documents will be confined to the minimum area necessary for the placement, repair or removal of the structure and will not exceed 10,000 square feet. Note: If the project includes any grading, excavation or land-disturbance activity in excess of 10,000 square feet you may also need to receive approval under a Grading General or Individual permit in addition to this permit.
6. The project plans minimize adverse impacts on fish movement, fish spawning, egg incubation periods and high stream flows, the project may not occur during the following time periods:
 - a. September 15 through May 15 for trout streams and navigable tributaries to trout streams.
 - b. March 15 through May 15 for ALL waters located south of state highway 29.
 - c. April 1 through June 1 for ALL waters located north of state highway 29.Note: Per ch. NR 1.02(7), the department identifies and classifies trout streams to ensure adequate protection and proper management of this unique resource. To determine if a waterway is a trout stream, you may use the Designated Waters Theme on DNR's Surface Water Data Viewer: <http://dnr.wi.gov/topic/surfacewater/swdv/>
- Note: The applicant may request that these time period restrictions be waived by the department on a case-by-case basis, by submitting a written statement signed by the local department fisheries biologist, documenting consultation about the proposed dredging project, and that the local department fisheries biologist has determined that the requirements of this paragraph are not necessary to protect fish spawning for the proposed project.
7. All equipment used for the project including but not limited to tracked vehicles, barges, boats, hoses, sheet pile and pumps shall be de-contaminated for invasive and exotic viruses and species prior to use and after use.
8. The following steps must be taken every time you move your equipment to avoid transporting invasive and exotic viruses and species. To the extent practicable, equipment and gear used on infested waters shall not be used on other non-infested waters.
 - a. Inspect and remove aquatic plants, animals, and mud from your equipment.
 - b. Drain all water from your equipment that comes in contact with infested waters, including but not limited to tracked vehicles, barges, boats, hoses, sheet pile and pumps.
 - c. Dispose of aquatic plants, animals in the trash. Never release or transfer aquatic plants, animals or water from one waterbody to another.
 - d. Wash your equipment with hot (>104° F) or high pressure water, steam clean or allow your equipment to dry thoroughly for 5 days.
9. Follow the most recent department approved washing and disinfection protocols and department approved best management practices to avoid the spread of invasive species as outlined in NR 40, Wis. Adm. Code. These protocols and

practices can be found on the Department website at <http://dnr.wi.gov/topic/Invasives/bmp.html> Keyword: "equipment operator" and at <http://dnr.wi.gov/topic/Invasives/documents/EquipOper.pdf>

10. All equipment used for the project shall be designed and properly sized to minimize the amount of sediment that can escape into the water.

11. Submit a series of photographs to the department within one week of placing the structure on this site and within one week of stabilizing disturbed areas on the site after removal of the structure. The photographs shall be taken from different vantage points and depict all work authorized by the permit.

SELF CERTIFICATION CONDITIONS

1. You must notify Nathan Walker at phone (715) 492-0243 or email nathan.walker@wisconsin.gov before starting construction and again not more than 5 days after the project is complete.

2. You must complete the project as described on or before 10/19/2024. If you will not complete the project by this date, there is no opportunity for an extension and you must apply for a new permit.

3. Your signed certification does not authorize any work other than what you specifically describe in your application and plans, and as modified by the conditions of your signed certification. If you wish to alter the project, you must first obtain written approval of the Department.

4. Before you start your project, you must first obtain any permit or approval that may be required for your project by local zoning ordinances and by the U.S. Army Corps of Engineers. You are responsible for contacting these local and federal authorities to determine if they require permits or approvals for your project. These local and federal authorities are responsible for determining if your project complies with their requirements.

5. Upon reasonable notice, you shall allow access to your project site during reasonable hours to any Department employee who is investigating the project's construction, operation, maintenance or permit compliance.

6. The Department may modify or revoke your signed certification for good cause, including if the project is not completed according to the terms of the eligibility standards and conditions for the activity or if the Department determines the activity is detrimental to the public interest.

7. You must post a copy of your signed certification at a conspicuous location on the project site, visible from the waterway, for at least five days prior to construction, and remaining at least five days after construction. You must also have a copy of your signed certification and plan available at the project site at all times until the project is complete.

8. Your acceptance of this letter and efforts to begin work on this project signify that you have read, understood and agreed to follow all conditions of your signed certification.

9. You shall maintain the project in good condition and in compliance with the terms and conditions of your signed certification, NR 320, Wis. Admin. Code and s. 30.206, Stats.

10. This project shall comply with all conditions identified in Wisconsin Administrative Code NR 320, and identified in the Instructions for the General Permit application.

11. You must submit a series of photographs to the Department, within one week of completing work on the site. The photographs must be taken from different vantage points and depict all work authorized by this permit.

12. You, your agent, and any involved contractors or consultants may be considered a party to the violation pursuant to Section 30.292, Wis. Stats., for any violations of Chapter 30, Wisconsin Statutes, or this permit.

13. Construction shall be accomplished in such a manner as to minimize erosion and siltation into surface waters. Erosion control measures (such as silt fence and straw bales) must meet or exceed the technical standards of ch. NR 151, Wis. Admin. Code. The technical standards are found at: http://dnr.wi.gov/topic/stormwater/standards/const_standards.html.

14. All equipment used for the project, including but not limited to tracked vehicles, barges, boats, silt or turbidity curtain, hoses, sheet pile, and pumps shall be de-contaminated for invasive and exotic viruses and species prior to use and after use.

The following steps must be taken every time you move your equipment to avoid transporting invasive and exotic viruses and species. To the extent practicable, equipment and gear used on infested waters shall not be used on other non-infested waters.

1. Inspect and remove aquatic plants, animals, and mud from your equipment.
2. Drain all water from your equipment that comes in contact with infested waters, including but not limited to tracked vehicles, barges, boats, silt or turbidity curtain, hoses, sheet pile and pumps.
3. Dispose of aquatic plants, animals in the trash. Never release or transfer aquatic plants, animals or water from one waterbody to another.
4. Wash your equipment with hot (>104° F) and/or high pressure water, - OR - Allow your equipment to dry thoroughly for 5 days.

FINDINGS OF FACT

1. The Department has determined that your signed certification of the project site and project plans meet the standards in s. 30.206, Stats. and ch. NR 320, Wis. Adm. Code., to qualify for this General Permit.
2. The proposed project will not injure public rights or interests, cause environmental pollution as defined in s. 299.01(4), Wis. Stats., or result in material injury to the rights of any riparian owner, if constructed in accordance with your signed certification.
3. The Department and the applicant have completed all procedural requirements, and the project as described in your signed certification will comply with all applicable requirements of Section 30.206, Wis. Stats., and Chapters NR 102, 103, 150, 299, 310 and 320 if carried out as proposed.
4. The applicant proposes to place a 50'x16' clear span bridge across the waterway between two paddocks of the deer farm. Because of the deer farm both sides of the bridge will have 8' high deer fence to keep animals out of the creek. The bridge will be placed approximately 2' higher than the bank, which is six feet higher than the normal water level.
5. The applicant has stated that the bridge design meets or exceeds the minimum height required to allow navigation under the bridge. This is especially important in this instance because of fending around the adjacent lands, and along both sides of the bridge for the deer farm, that the ability to portage around the bridge will not be available.

CONCLUSIONS OF LAW

1. The Department has authority under ch. 30, Wis. Stats., and ch. NR 320, Wis. Adm. Code, to grant approval for the construction and maintenance of this project.
2. The Department has complied with s. 1.11, Wis. Stats.

September 15, 2021

We would like to construct a free span bridge to connect the two eighty acre deer fences on our property at 29055 Hagstrom Rd. Ashland, WI. The bridge will allow access between the new fences which are scheduled to be completed in the Fall of 2021. The bridge will be constructed at the narrowest part of the creek which approximately 35 feet wide and the banks of the creek are six feet higher the creek bed. There is currently only six inches of water in the creek. The bridge will be constructed two feet higher than the bank and extend approximately fifteen feet beyond the creek bank. The bridge will be sixteen feet wide.

(Disclaimer): Any future expansions or development would require additional permitting.

Condition(s): Build as Proposed. Work with DNR to meet their needs. Use Best Management Soil Erosion Practices on disturbed areas.

You are responsible for complying with state and federal laws concerning construction near or on wetlands, lakes, and streams. Wetlands that are not associated with open water can be difficult to identify. Failure to comply may result in removal or modification of construction that violates the law or other penalties or costs. For more information, visit the department of natural resources wetlands identification web page or contact a department of natural resources service center (715) 685-2900.

NOTE: This permit expires one year from date of issuance if the authorized construction work or work or land use has not begun.

Changes in plans or specifications shall not be made without obtaining approval. This permit may be void or revoked if any of the application information is found to have been misrepresented, erroneous, or incomplete.
This permit may be void or revoked if any performance conditions are not completed or if any prohibitory conditions are violated.
